## **MODEL QUESTION-ENGLISH SENIOR.**

Time: 10 minutes.

Max.Marks: 100

Typewrite the following passage in double line spacing with accuracy and neatness.

The GST Council has reached a consensus on several significant issues such as fixing the threshold limit for registration; full compensation for five years to States for losses on account of GST implementation; adopting a growth rate of 14 percent per year over the base year 2015-2016 for the purpose of calculating the revenue of the States for determining compensation; finalization of the draft legislation for Central Goods and Services Tax, integrated Goods and Services Tax and compensation; and cross empowerment of Central and State Government officials to administer all GST statutes. The Government is committed to enacting State Goods and Services Tax Act as and when the above taxes laws are enacted by the Parliament. Regarding the Planning and Development that the Government of India has done away with the distinction between Plan and Non Plan allocations in Budget formulation from previous years. We welcome this move, which has been the long standing demand of our Government, as it would simplify the budgetary process and keep the focus firmly on the functional classification of expenditure. In consonance with the above approach, this Government will replace the State Planning Commission with the State Development Policy Council to advise the Government on policy matters and formulation of programmes to guide the development of the State.

Under the visionary leadership of the Honourable Chief Minister, the vision

Tamilnadu document was formulated and released, which aims at promoting equitable and sustainable economical growth of the State. The economic survey has revised the Gross Domestic Product growth rate of India for the year 2019-2020 to 8 per cent and has projected the growth rate to a higher level.

It is essential that our economy be rejuvenated to achieve a higher economic growth that would enable the Government to mobilize more resources to meet its commitment. The pace of economic activity is picking up and it is expected that Gross State Domestic Product will grow more. We expect that the concerted efforts of this Government will further create a favourable environment for increased private and public investment in key sectors, thus boosting the economic growth to nine per cent during the year under review. The Government has been implementing the new life project through the State. This project is coming to a close in the month of June. In the next phase, the World Bank assisted Tamil Nadu Rural Transformation Project will be launched to cover all the rural areas. Under this new project, the weaker sections of the people will be taken into consideration to reduce the poverty level. This schemes assures for three time food and shelter to these people. These people are the most sufferers whenever flood and cyclone affected their life.
